

SUPPLIED THROUGH SURGIVAL (ES)

Joint replacement

Hip and knee replacement, fully supported.

Hip and knee endoprotheses covering both primary replacement and revision, with matching consumables and instrumentation. We help your team choose the right system for each patient - anatomy, approach and procedure - and stand beside you with on-site clinical support.

✓ Since 2013

✓ Led by doctors

✓ Hospitals and clinics

FEATURED RANGE

Hip & knee endoprotheses

A complete endoprosthesis range for hip and knee - primary and revision - built around the Genutech DCF knee and a hip portfolio with classic, short-stem and dual-mobility options, chosen with the surgical team.

- ✓ Genutech DCF knee system
- ✓ Short stem for the anterior (bikini) approach
- ✓ Primary and revision pathways
- ✓ KAREY classic hip stem
- ✓ Dual-mobility system for older patients
- ✓ On-site implantation support

THE RANGE
