

SUPPLIED THROUGH MEDGAL (PL)

Trauma implants

Solutions for fractures and bone reconstruction.

We do not simply supply implants - we help surgical teams choose the right solution for each injury, anatomical area and procedure. A full osteosynthesis range spanning large-bone fracture stabilisation, upper-limb injuries, shoulder and clavicle, and the knee, lower leg and ankle - our best-selling line, backed by a physician in the operating room for the first implantations.

✓ Since 2013

✓ Led by doctors

✓ Hospitals and clinics

FEATURED RANGE
